# ANOTHERCLASH

## LINEUP

NIC LAN - vocals, keyboards  
MARTY MCFLIGHT - bass  
BO KOBI - drums  
KIRILL MUSSINSKI - guitars

The band was formed in fall 2011. Initially planned as a 5-piece guitar band it went through number of changes that led eventually to the fact that by the end of 2012 the band reduced to four members and its sound was extended by inclusion of psychedelic electronic devices.

International lineup reflects to some extent the eclectic spirit of Berlin - homecity of the band. Same spirit is also embodied in their music: Anotherclash strives to combine the ease and groove of rock music from the 60s and 70s with the up to date arrangements.

The music of Anotherclash is based on classical rock guitar sound but impregnation of sound effects along with the way the band arranges their songs bring a message from night clubs and indie pop culture.

The self-description goes as: It's about that naive feeling of playing music each time as if it was the first time. Perceiving music as an unexplored territory where one needs to be ready to face both miracles and dragons any time.

Anotherclash is formed up of experienced musicians and gives an energetic live performance while keeping a diverse and ingenious approach to recording. The band is now working on the first album.

During the 2012 Anotherclash has played a number of gigs in Berlin always having a good response from the audience. (Tiefgrund, Chester's Music Inn, Junction Bar, White Trash, Bassy).

## Nic Lan

Born in Florence, moved to Berlin and became a voice of the band. Nic Lan is also responsible for psychedelic sound effects delivered by different and sometimes weird electronic devices. He is heavily engaged in song arrangements and takes a significant part in lyrics writing.

Nic's background includes playing in a number of projects in Italy and active music life in Berlin.

## Marty McFlight

Comes from Ruhrgebiet he is responsible for the very basement of the band's sound. Bass guitar that somehow manages to rally rock traditions and electronic dance way of perception. This combination is one of the most distinctive factors in defining what Anotherclash is. Also studio work and band sound engineering are guided by Marty.

His background includes a number of indie projects and a considerable experience in electronic music.

## Bo KoBi

The heart and locomotive breath of the band. Bo Kobi is the one who makes people think they were born to dance. Tricky fills and unceasing groovy bits is his realm. True Berliner he grew up in Kreuzberg and played drums in numerous indie and rock bands before joining Anotherclash.

Also in the time left from making music he has become a professional polar researcher.

## Kirill Mussinski

Comes from Minsk (Belarus) and makes music ever since he can remember himself. Nature born drummer; few years ago he decided to invest some of his drumming passion into guitar. He brings most of the songs ideas.

Kirill had a successful music career in Belarus and played in a number of various projects ranging from indie till pop.

# EP

The first official EP was recorded in March 2013. The recording sessions took place in the small private studio. However for making a record Anotherclash didn't use a classical studio environment. All instruments and equipment were set up in a large and empty neighbouring room which is usually being used for yoga training. The room provided a sound with natural reverberation and beautiful warm coloring. Only after recording all tracks in this atmosphere the production moved to the studio control room.

For the final mixing band tried to reconstruct classical Wall of Sound technology.
